BEST PARENT AWARD

School plays a vital role in children's all round development. All the activities and teaching pattern of a school shall focus on growth of children. Because only actions are not necessary but also its fruitfulness is necessary. And usually a mind thinks that the overall responsibility of a child is on the teachers. But it is not true. The parents have the equivalent role in the growth and development of children. Because the children spend most of the time with their parents. So obviously every action and word of a parent has a significant role on children. On the other hand parents' cooperation is also needed with school. In order to follow the rules and regulations, to make the students study at home, to make them to complete the homeworks, to be overall supportive to school. Thus, in our school we have been appreciating the parents for their such kind of cooperation and for the same reason we use to select a parent of the year who use to be best cooperative parent the entire year. Who supports in all the co curricular activities, sports, functions, etc. We do have a large nos of parents who are very supportive and cooperative in every manner and thus it is a very tough job to select one out of them as a best parent. But here also we get their cooperation that they never raise any issue, or claim any reward as they do all their cooperation sincerely and for the sake of their children. Even it shows that they are not focussing only on their own child but its sounds like every children of the community is their responsibility. However to appreciate the best parent for the year 2016 - 2017. We arranged a program and invited By **Late Mr. Khan Abdul Rauf** (Ex. Chairman Urdu Sahitya

Academy, Govt. of Maharashtra). to give away the award of best parent. It was really a wonderful day and it motivated all other parents to participate their best and be the best parent of the year for the next year.
